ORNAMENTAL & SHADE TREES

The following trees will be dug bare-root, balled and burlapped in a large ball of a peat mixture and wrapped with Polyethylene on the outside. This will allow the trees to be left standing on the open ground for long periods without watering. Trees balled this way will weigh about one-third as much as trees balled in earth.

We have experimented with balling trees in this way for several years and they have come through fully as well or better than trees balled in earth. They may be planted by merely taking the polyethylene wrapping off and planting the ball intact or by removing the complete ball and planting the tree bare-root.

For a regular earth ball with burlap, for trees priced at \$8.00 and under, there will be a \$1.00 additional charge and for trees priced at \$9.00 and over, there will be a \$2.00 additional charge.

NOTES

The first thing I noticed when I stepped out of the car was the smell of fresh earth. It was a warm, comforting scent that seemed to wrap around me. I took a deep breath, feeling the cool air fill my lungs. The sun was shining brightly, casting long shadows on the ground. I looked up at the sky, seeing a few wispy clouds. It was a beautiful day, and I felt a sense of peace and tranquility. I walked slowly, savoring every moment of the journey.

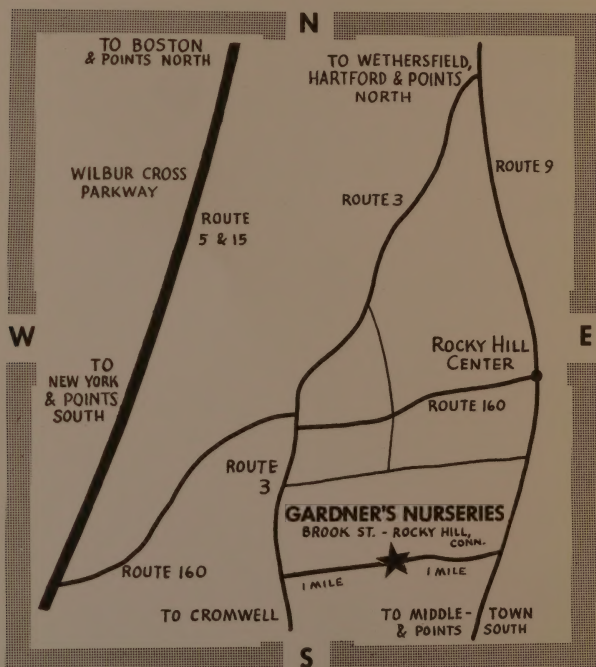

The second thing I noticed was the sound of the wind. It was a soft, gentle breeze that seemed to whisper to me. I closed my eyes and listened intently, feeling the wind's touch on my skin. It was a soothing sound, and it made me feel like I was part of something greater than myself.

One of the few Nurseries in the country today with a large quantity of young, thrifty stock, ready for immediate shipment.

Our Nurseries are located in Rocky Hill and Cromwell, on the State Highway, Route #9, between Hartford and Middletown. See sign on Route #9 in Rocky Hill. 1,000 acres of choice Evergreens and Shade Trees that have been properly root pruned and sheared.
